Trip Details

- Date: 22 July, 2018
- Display: The American Precision Museum holds exhibits of precision tools and machines from before the Civil War era, as it was formerly a gun factory. They received a donation of the Keely machine, but do not keep it for public display normally. This trip was a special allowance due to the request put in by CSR Hawthorne Valley.
- Guide: Scott Davison

Front Face

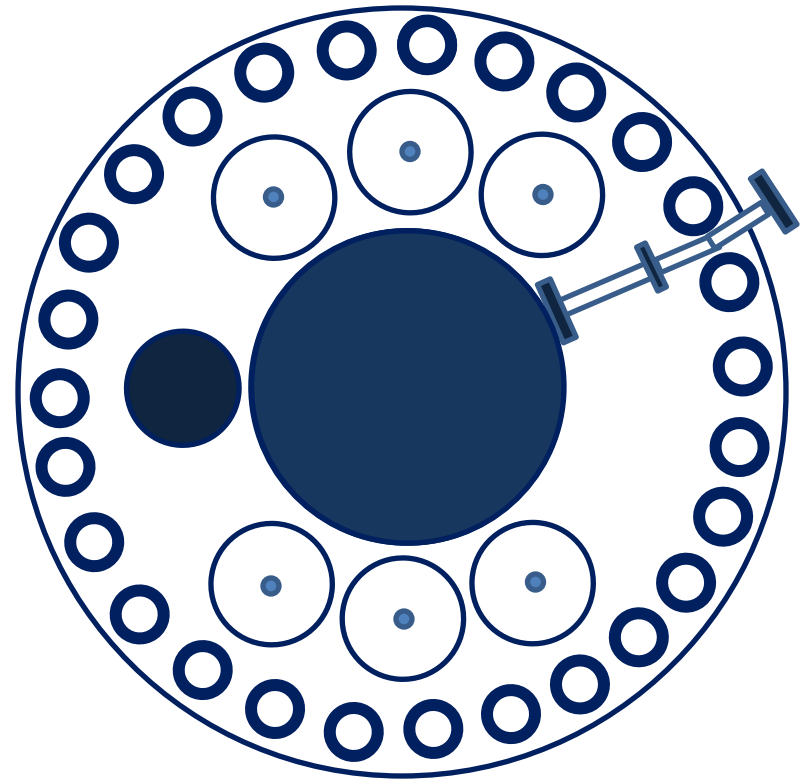

27 small holes
19 open, 8 closed

6 cavities, more copper
Brass frame

Back Face

27 small holes
All have knobs

One extra empty cavity, no copper
Side strips seem to be chrome steel
